

PASSIFLORA CULTIVARS 2011-2013 NOTES

Cultivars 2011-2013 (numbers 167-187)

Cultivars up to June 2011 (167-178) will be found in:

Passiflora-cultivars-2011.01-2011.06.pdf

Cultivars from July to December 2011 (178-187) will be found in:

Passiflora-cultivars-2011.07-2013.pdf

A cultivar 178 appears in both documents, on which see Cultivar 178 - Disambiguation below

No new cultivars were registered during the years 2012-2013

Cultivar 178 - Disambiguation

The cultivar P.'Lia Vallini' was published by the then registrar, Les King, in Passiflora Cultivars (2011) (available as Passiflora-cultivars-2011.01-2011.06.pdf) with the number 178 and dated 11/6/2011. It was the last cultivar he examined before he stepped down. He was eventually succeeded by Shawn Mattison who published his first (and only) register in the PSI Journal special edition Cultivars 2014-5, covering numbers 188 - 228 (available as Passiflora-cultivars-2014-2015.pdf).

In the interregnum, officers of PSI maintained the register, but inadvertently reused the number 178 when they published cultivars 167 - 187 in the PSI Journal Spring 2012 (Volume 22 number 1) pp 16-22 (of which pages 20-23 are here filed as Passiflora-cultivars-2011.07-2013.pdf). The number 178 was applied to the cultivar P. x colvillii 'Hubert Vranken'. To avoid confusion, this cultivar should in future be cited under the number 178.2.

Similarly, the number of P.'Lia Vallini' should in future be cited under the number 178.1. References to number 178 will be treated as referring to P.'Lia Vallini' but should be avoided.

Note also that the first publication date of cultivars 167-178.1 is 2011, while that for 178.2-187 is 2012.

Robert Rice
Registrar
